# ZUMRO Shelter Model 311-L3 with 5-Step Decon Shower

## Models 311-L3 Shelter with 5-Step Decon Shower Features and Design

The Model 311-L3 with 5-Step Decon Shower has significantly more shower space to accommodate for “assisted” Decon Procedures.

The “open” corridor design allows for added patient control, however, removable cross curtains offer total privacy when required.

The Shelter is Pre-plumbed with a new modular shower design that allows customer control over the type of Shower System to be used in each of the nine “snap-on” shower locations. There are three types of showers available: a Surround Shower Hoop, Hand-Held Shower on a recoil hose or Fixed Shower Head.

Shower Curtains and Inflatable Containment Pool are pre-installed and deploy with the Shelter. Rapid Roll Grids offer elevation when needed.

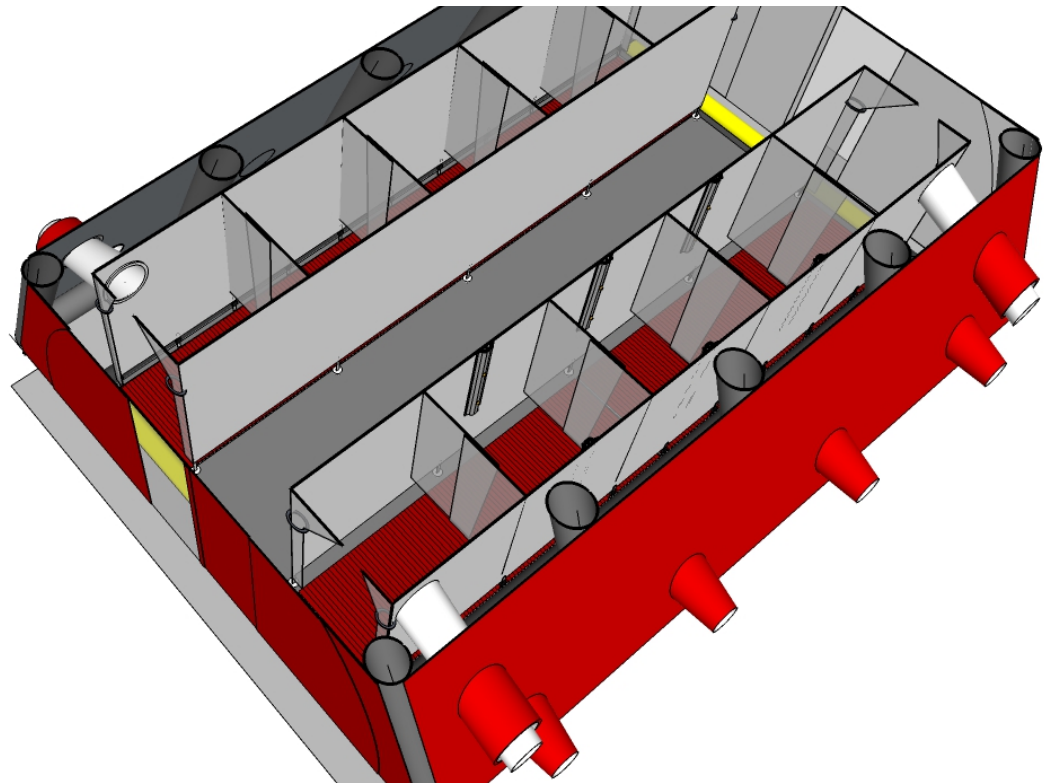

5-Step Shower System with all privacy curtains for featuring stations for Undress, 3 Shower Compartments and Redress.

Custom laundry sleeves on both sides and entrance and exit of tent.

The 36" Center Corridor can be used for Ambulatory or Non-Ambulatory Patients.

The **NEW Model 311-L3-5-Step** has an “open” three-lane design with removable privacy curtains.

There are nine pre-plumbed outlets. Choose from Surround Shower Hoops, Hand-Held Shower Nozzles or Fixed Showers heads for total flexibility! There are two Decon and one Rinse position in each lane for maximum patient flow!

- ▶ 120 Walking Casualties/Hr.
- ▶ Power Deployed in minutes.
- ▶ 3 Corridor Design
