

INTERIOR OPTIONS

INSULATION (Radiant Barrier, Roof Only)

Radiant Barrier Insulation shown with optional HVAC ducting, LED lighting and cross divider curtain.

RADIANT BARRIER INSULATION is a pre-installed lightweight panel reflecting 95% of the radiant heat from direct sunlight.

The Insulation Panel remains in the tent and is removable/replaceable.

INTERIOR HVAC DUCTING

HVAC DUCTING is a pre-installed, lightweight, fabric duct used to distribute air from external HVAC units throughout the entire shelter.

The HVAC Ducting is permanently installed in the shelter, and is removable/replaceable.
